

UK's premier supplier of Engineering Solutions, Products and Services

No two customers requirements are ever the same when it comes to providing vacuum plant. so a bespoke design and manufacturing service is essential to meet customer requirements. Creative's approach is to combine a number of existing tried and tested modules and design concepts and use these as building blocks for the bespoke system. this ensures a reliable and cost-effective solution, whilst satisfying the client's requirements. the following details some of the bespoke vacuum plant that is available from Creative.

Central Vacuum Systems

Reservoirs and tank units that provide central vacuum services for medical, laboratory and industrial applications. Systems for medical applications meet all the stringent hospital standards and typically include a duplex pumping and bacterial filter combination for serviceability without down time. all plumbing is manufactured in stainless steel and helium leak tested. for industrial and scientific applications single or duplex pumping systems are available with vacuum levels better than 6.5 mBar. Various mounting options add to the design flexibility.

High Vacuum Pumping Systems

These self contained units offer high orders of vacuum and performance for UHV Systems, thin film coating, mass spectrometry and gas analysis. Creative can offer a wide range of sizes, makes and combinations to suit the customer's requirements.

Degassing Chambers

Creative's stainless steel degassing chambers are ideal vessels for vacuum impregnations of components, degassing of potting compounds, oils and other lubricants. They incorporate a transparent lid to allow viewing of the items being degassed.

Plant Service Kits

Vacuum Plant Service Kits are available to provide a range of Clamps, Blanking Flanges, Viton 'O' Rings, C'Rings and a tube of high vacuum silicone grease.

Vacuum Ball Valves

Vacuum Ball Valves are inexpensive manually operated valves. They are ideal for many vacuum applications and come in a range of sizes
